

### Food Safety Statement

Kingswood is a small family run company committed to preparing school meals from as many locally sourced organic and free range produce as possible.

In light of the recent food industry findings about the contamination of beef with horse meat we would like to reassure parents that all beef and beef products on our primary menu is **organic** and sourced from one supplier based in Derbyshire. More information about our supplier can be found at [www.lowerhurstfarm.co.uk](http://www.lowerhurstfarm.co.uk)

The beef on our secondary menu is also **organic** and sourced from the same supplier apart from our beef burgers, which are sourced from Hopwells in Nottingham. The beef burgers received a negative result during a recent DNA test and documentation for this has been sent to all our secondary schools.
